Lockette:

This plugin allows for you to lock your chest to protect your loot. It can also be used to lock doors and furnaces and jukeboxes.

What you need: Chest, sign, furnace, door.
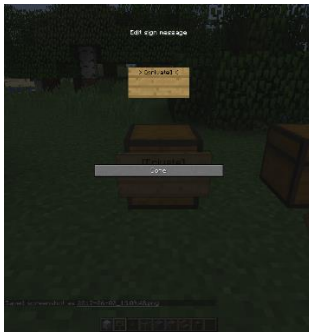

Locking your chest:

1. Place single or double chest

2. Right click on the chest with a sign.

3. First line of sign type: [private] *note* You must use the brackets on either end [ ]

4. Click done

You can also place lockette signs on jukeboxes, furnaces, and above doors the same way you do it for the chest.

Add Other Players to Chest/Door/Furnace/Jukebox:

1. Right click on private sign.
2. Type: /lockette (line number 3, 4) and player name. Ex: /lockette 3 LittleLibrarian

3. Click done.

To Add More than two other players to chest you must add a new sign to the chest and
type [More Users] on line one and then add player names on lines 2-4.

Note You can have 3 names total on each sign.

Timers: Doors can also have a set timer. (Doors that are also locked will not respond to redstone power
or switches.)

1. Place sign above your door and type [private] on line one. You name on line 2. And [Timer: #] on
   line three or four. # is the number of seconds the door will stay open. So for example if you want
   the door to stay open for 5 seconds you would type: [Timer: 5].
