

Fill in your username and password then  
Click on the “Sign in” Button

### Sign In

**Username**

**Password**

 Click on the "Sign In button"

Fill in the name of your workstation. I put an example in for “MadisonCirc” I make it pretty simple and NOT use spaces or hyphens. Once you type in the workstation name, press the “Register” button. Once you do that, it will show “Workstations Registered with the browser”, Click on the green “Use now” button

Now it will take you back to the login screen with the username, password and workstation. Just log in as normal now.

Please register a workstation.

Fill in a workstation name
